

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate with hands-on experience in **AI application development**, **Python-based systems**, and **full-stack engineering**. Skilled in building intelligent, scalable applications using **LangChain**, **Gemini API**, **LangGraph**, **FastAPI**, and modern web stacks.

EDUCATION

- **Pune Institute of Computer Technology**

B.E. in Artificial Intelligence and Data Science; CGPA: 9.25/10

Pune, India

2023 – Expected 2027

SKILLS SUMMARY

- **Languages:** Python, JavaScript, TypeScript, C++, Java, SQL

• **AI/ML & Frameworks:** LangChain, LangGraph, Gemini API, FastAPI, React.js, Next.js, Node.js, Express.js, Socket.io

• **Databases:** PostgreSQL, MongoDB, Prisma ORM, Drizzle ORM

• **Deployment/DevOps:** AWS, Docker, GitHub Actions, Git, Github

EXPERIENCE

- **Valnee Solutions**

Full Stack Developer Intern

Remote

December 2025 – March 2026

– Built **Atlas analytics engine** for SignalMint integrating Meta Ads API, computing ROAS, CTR, CPC metrics with Celery-based async scheduling for 90-minute data refresh cycles.

– Designed **multi-engine AEO pipeline** for ReachSaga querying OpenAI, Gemini and Perplexity simultaneously to compute brand visibility scores across AI answer engines.

– Implemented **RBAC system** with structured permission conventions, API middleware enforcement and frontend route protection across multi-tenant SaaS platform.

• **Froncort Inc.**

Frontend Developer Intern

Remote

June 2025 – September 2025

– Designed and developed the new **Prompt-to-Decision (P2D) workflow UI**, streamlining a 6-step process for improved usability.

– Built a completely new **landing page UI from scratch** based on a fresh Figma design, ensuring pixel-perfect, responsive layouts.

PROJECTS

- **Mercury CLI**

Node.js, PostgreSQL, Prisma, Gemini AI, Vercel AI SDK

[GitHub]

– Developed an AI-powered CLI with chat, web search, code execution, and an **agentic mode** that generates full applications.

– Implemented **multi-tool agentic pipeline** with dynamic tool selection across web search, code execution and application generation modes.

• **PICT-MUN Chit System [Live] [GitHub]**

React.js, Node.js, PostgreSQL, Socket.io, Redis

– Built the first online chit system in the Pune MUN circuit with **real-time messaging** for 100+ concurrent users using Socket.io.

– Added full admin suite: user creation/deletion, automated credential emails, and participant management.

ACTIVITIES

- **Technical Head – PICT Entrepreneurship Development Cell (EDC)**

May 2025 – March 2026

Pune, India

– Led a development team to build and deploy the registration platform for the flagship event **Magnate**, ensuring smooth handling of **200+ registrations** and reliable production deployment.

– Developed admin and user-facing features including registration management, automated confirmation emails, and a QR-based startup voting system used during the event.

• **USG Tech – PICT Model United Nations (MUN)**

March 2025 – April 2026

Pune, India

– Co-led development of the official PICT MUN platform and built the digital chit system, making it the first MUN in the Pune circuit to adopt real-time chit exchange.

– Supported a live chit system with **200+ concurrent users over 2 days**, ensuring stability, low-latency communication, and smooth delegate-EB interactions.
